DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-11 drawn to a radio communication apparatus which uses low-intermediate frequency to receive multiband OFDM signal, classified in class 375, and subclass 349.
 - II. Claims 12-20 drawn to a radio communication apparatus which uses low-intermediate frequency to transmit multiband OFDM signal, classified in class 375, and subclass 299.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions a radio communication apparatus which uses low-intermediate frequency to receive multiband OFDM signal and a radio communication apparatus which uses low-intermediate frequency to transmit multiband OFDM signal are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention a radio communication apparatus which uses low-intermediate frequency to receive multiband OFDM signal and a radio communication apparatus which uses low-intermediate frequency to transmit multiband OFDM signal has separate utility such as usage as generating clock/timing signals or determining a value for a burst CDR generation register independently. See MPEP § 806.05(d).

3. Inventions a radio communication apparatus which uses low-intermediate frequency to receive multiband OFDM signal and a radio communication apparatus which uses low-intermediate frequency to transmit multiband OFDM signal are unrelated. Invention are unrelated if it can be shown that they are not disclosed as capable of use together, or they have different modes of operation, or they have different functions, or they have different effects. (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions a radio communication apparatus which uses low-intermediate frequency to receive multiband OFDM signal and a radio communication apparatus which uses low-intermediate frequency to transmit multiband OFDM signal each has a different function independent of each other.

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
